

WHAT IS CLAIMED IS:

1. A mirror base comprising a mount piece for mounting on a car; and a support piece projecting from the mount piece and adapted to support a mirror body,  
5 the mount piece and the support piece being integrally molded of a resin, wherein a reinforcing core member is buried inside across the mount piece and the support piece.

2. The mirror base according to Claim 1, wherein  
10 the core member is provided with a rib for enhancing flexural rigidity of the support piece relative to the mount piece.

3. The mirror base according to Claim 1, wherein the core member is provided with a mounting portion  
15 bordering a mounting surface of the mount piece to be mounted on the car.

4. The mirror base according to Claim 2, wherein the core member is provided with a mounting portion bordering a mounting surface of the mount piece to be  
20 mounted on the car.

5. The mirror base according to Claim 3, wherein said mounting portion is a mounting nut portion.

6. The mirror base according to Claim 3, wherein said mounting portion is a mounting bolt portion.

25 7. The mirror base according to Claim 4, wherein said mounting portion is a mounting nut portion.

8. The mirror base according to Claim 4, wherein said mounting portion is a mounting bolt portion.

5 9. The mirror base according to Claim 1, wherein the core member comprises a continuous flange formed in a marginal region thereof.

10. The mirror base according to Claim 2, wherein the core member comprises a continuous flange formed in a marginal region thereof.

10 11. The mirror base according to Claim 3, wherein the core member comprises a continuous flange formed in a marginal region thereof.

12. The mirror base according to Claim 4, wherein the core member comprises a continuous flange formed in a marginal region thereof.

15 13. The mirror base according to Claim 9, wherein said core member is comprised of a pressed product.

20 14. The mirror base according to Claim 10, wherein said core member is comprised of a pressed product.

15. The mirror base according to Claim 11, wherein said core member is comprised of a pressed product.

25 16. The mirror base according to Claim 12, wherein said core member is comprised of a pressed product.
